

Node Company for Software Solution

Custom Software Development • Web Platforms • FinTech Solutions

No:	CON-00025
Effective:	9/9/2025
Total:	\$3,000
Payments:	\$1,500 + \$1,500
Currency:	USD

1. Project Scope

The Company designed, developed, and delivered a financial management system (frontend + backend) including: authentication, role-based access, payments & expenses modules, reporting dashboard (daily/monthly/yearly), PDF exports, currency rate management, and deployment guidance.

2. Deliverables

- Complete source code (frontend & backend) in TypeScript.
- Database schema & migrations (Prisma).
- API documentation & example environment file.
- Automated PDF generation Engine.
- Deployment & configuration instructions.

3. Payment Terms

Total price: USD \$3,000. Client shall pay \$1,500 upfront and \$1,500 after successful installation & configuration on the Client's local environment/device. Deployment includes database migration, environment setup, and verification of core features (login, currency update, payments, expenses, reporting).

4. Change Requests

Any new features or material scope changes not explicitly listed are billed separately under a new written quotation approved by the Client prior to implementation.

5. Intellectual Property

Upon receipt of full payment, all custom source code and related assets developed specifically for this project are assigned to the Client. The Company retains the right to reuse generic components, utilities, and non-proprietary patterns.

6. Confidentiality

Both parties agree to keep confidential all non-public technical, business, and financial information received during the project. This obligation survives termination.

7. Warranty & Support

The Company provides a 30-day defect remediation period after final delivery covering bugs that materially impair core functionality (payments, expenses, reports, auth). Enhancements or new modules are excluded.

8. Deployment & Acceptance

Final payment becomes due when the system is deployed locally and the Client verifies: (a) login works, (b) currency rate can be updated, (c) a payment and an expense can be added and appear in reports, (d) PDFs generate successfully.

9. Liability

Maximum aggregate liability of the Company for claims arising out of this Agreement shall not exceed the total fees actually paid. No party is liable for indirect or consequential damages.

10. Governing Law

This Agreement is governed by and construed in accordance with applicable international commercial principles and, where relevant, the laws of the Company's jurisdiction unless otherwise mutually agreed in writing.

11. Entire Agreement

This document constitutes the entire agreement and supersedes all prior discussions. Amendments must be in writing and signed by both parties.

12. Third-Party Modifications

The Client acknowledges that any alteration, refactoring, reverse engineering, partial extraction, or modification of the delivered source code by any third-party developer or service provider without the Company's prior written consent immediately voids all warranties, maintenance obligations, and implied assurances of performance or security. The Client (and any third party it engages) assumes full responsibility for defects, instability, data loss, or security vulnerabilities introduced after such unauthorized changes. The Company has no obligation to audit, repair, or support a modified codebase except under a new, separately scoped and priced written agreement. The Client agrees not to grant repository or server access to external parties unless they are bound by confidentiality terms at least as strict as those in this Agreement and the Company is notified in advance.
